

## Eocortex advanced consulting seminars program

A series of web-based seminars with final testing of passed materials. A subject of successful test completion is Eocortex certificate (is issued for a period of one year). An education program provides for acquisition of Eocortex software expertise.

The purpose of a program: an acquisition of knowledge on in-depth technical aspects of the Eocortex software in a simple and clear form. Sales and additional promotions after completing the course are not provided.

The program is aimed at:

technical specialists

installers, video surveillance system designers, external systems developers

Course format:

- 3 seminars for 1.5-2 hours
- For certified participants of Basic Education Course only
- Verification of the assimilation of the material - an online test (20 questions, 2 attempts are given).
- The course is carried out in three days

A list of a general content:

### **Logs:**

debug mode

location (win, linux)

files to be viewed and what can be understood from it (?)

Error types (coded by us, .net errors) (?)

### **Backups:**

location

When a backup is created

how to restore a system from backup

channel id

channel export/import

server configuring as a videorecorder

camera stream receiving (for integrations, etc.)

### **API / SDK:**

what for and how to use

api requests examples

broadcasting to the site (as one of the most frequently asked questions)

### **Archive:**

archive layers

archive decimation (in detail)

audio recording in archive

### **Motion detector and analytics:**

object size and zones setting

how it is related to analytics modules (on the example of tracking)

### **Answers to questions from participants:**

Answers to questions from participants:

### Certification test

1. After Day #3, a link to Certification test is emailed to each participant (the test also included the feedback about education course)
2. Participants pass the online testing. Access is granted to participants attending at least 2 seminars.
3. 2 attempts are given.
4. 70% (and more) of right answers must be achieved in order to successfully pass the test.
5. The test contains 20 questions in the topics covered.
6. A link to the certification test and seminar recordings are sent within 2 working days after the end of the course. Answers to the test are accepted within the next 7 calendar days.
7. Certificates are sent to the participant's email, which he specified in the test.
